

Academic Affairs Kualiti Build CoP

A Community of Kualiti Build Users to Connect, Collaborate and Create

About

Academic Affairs Kualii Build Community of Practice

"A community of Kualii Build users to connect, collaborate and create."

Designed to support the refreshed Strategic Plan and strategy for **Operational Alignment**.

Deploy common tools and structures to enable flexibility and efficient coordination with local solutions, also making it easier to work across the university and extend the reach of ideas and activities.

C

Connect: -Build Community -Grow Resources -All Experience Levels

C

Collaborate: -Bring Qs & As -Learn by Collective Experience -Share Lessons Learned

C

Create: -Build Better Apps -Improve Workflows -Reduce Waste

Contents

Introductions

- Name
- Unit
- What Quali Build topic/sample would you like to learn or see demonstrated this year?

What's New?

News!

Kuali Announcements

- **New: Hierarchical Group Selection in Data Lookup Gadgets**

- You can now select Groups from within your organizational blueprint hierarchy in a single lookup.

- **Coming Soon: Streamlined UI updates - Preview Now!**

- Preview in your individual browser, so you can safely explore the new interface without impacting other users. It also lets you see both the admin experience and what your end users will see when completing documents.

- **New: Form Outline Download**

- You can now download a complete, review-ready outline of your form directly from the form designer. This makes it much easier to gather feedback during development and share full specifications with stakeholders.

- **New: Read Only Gadgets and Default Values**

- Now control how data is set and edited in your forms with new Read-only and Default Value configurations - easier to support integrations, protect source-of-truth data, and standardize key values across your forms.

CoP Suggestions for New Kuali Builders

Waldrop, Kevin 5/21 3:03 PM

Today's CoP Topic - What would you suggest for a new Kuali Builder?

As part of today's CoP Introductions, we are asking each attendee to reply to this question. Do you have advice, a tip, a link, an idea for someone new to Kuali Build? How can we help our new Builders? Add your comments below, and thank you!

Hendricks, Nicole 5/21 3:08 PM

Shadow a Kuali SME and utilize the APIs

Erickson, Nickolaus 5/21 3:08 PM

If you have the opportunity, chat with other builders to see what they have done. If you're a visual person, write out off Kuali workflow how you want a form to go and then start plugging things into the workflow to see that it works the way you wanted. Test test test before sending out.

CoP Suggestions for New Kuali Builders

Schroeder, Mindy 5/21 3:09 PM

Kuali is finicky. When you're working on the workflow, you can lose your work if the workflow isn't saved. Make sure you have someone show you how to save it so you don't lose it.

Weems, Bonnie 5/21 3:09 PM

Search the documentation before Google. They do a pretty good job keeping it up-to-date and the platform options are constantly changing

Hoffmann, Giulia 5/21 3:09 PM

Test out whatever forms you've built with some colleagues first before you go live! Lots of different types of colleagues/across various units so you can see if there are any issues with various people viewing things, etc.

Levy, Katherine 5/21 3:12 PM

See if someone else has a form with features or fields you like and use it as a baseline to get started.

Knowles, Margarita 5/21 3:16 PM

It was easy to learn, and fun to build forms.

Waldrop, Kevin 5/21 3:55 PM

(Watch a video, [links here](#)) Start small! Create a simple form with 1 or 2 steps in the workflow and watch it work! It gives a great boost to add another step, and keep growing your experience!
